Business Approaches to Society

Spectrum of business incentives to partner, from philanthropic to strategic core business

Business Approaches to Society

To make what is good for the country good for the enterprise requires hard work, great management skill, high standards of responsibility, and broad vision. It is a counsel of perfection. To carry it out completely would require the philosopher's stone that can translate the basest element into pure gold.

But, if management is to remain a leading group, it must make this rule the lodestar of its conduct, must consciously strive to live up to it, and must actually do so with a fair degree of success. For in a good, a moral, a lasting society, the public good must always rest on private virtue. Every leading group must be able to claim that the public good determines its own interest. This assertion is the only legitimate basis for leadership; to make it a reality is the first duty of the leaders.

Climate change reimagined

- Tellart, in partnership with the Dubai Future Foundation, opened a major exhibition at the annual World Government Summit in Dubai.
- The resulting exhibit re-imagined the three biggest factors contributing to humanity's ecological footprint – global industry, agriculture, and urbanism – as a means to radically innovate the way we live on Earth.

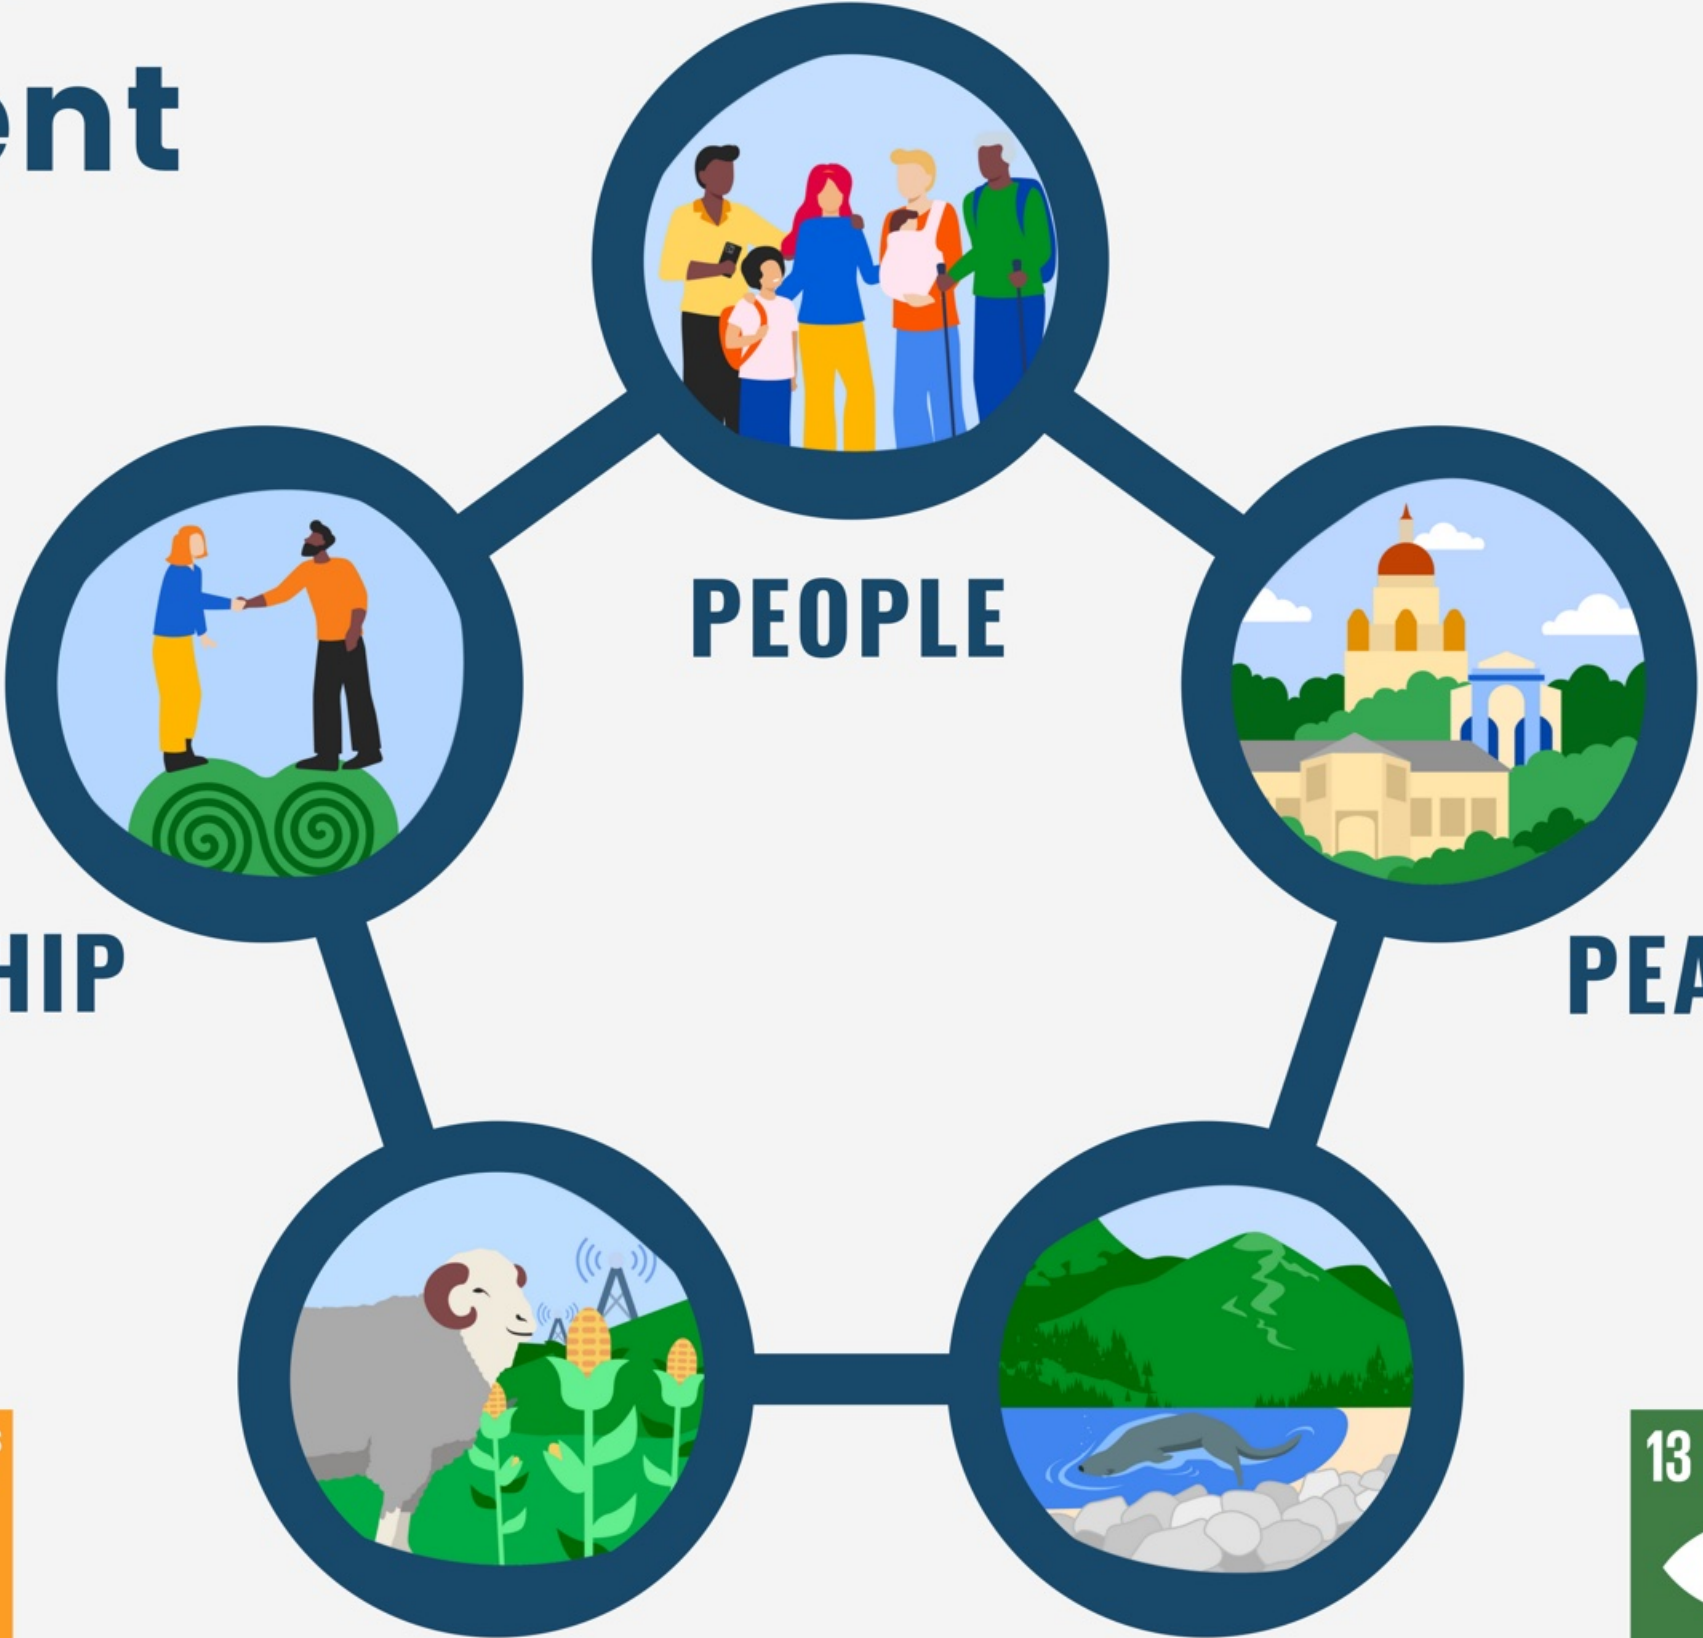

The 17 Sustainable Development Goals

THE GLOBAL GOALS

The Sustainable Development Goals (SDGs), also known as Global Goals, are a set of 17 integrated and interrelated goals to end poverty, protect the planet and ensure that humanity enjoys peace and prosperity by 2030.

Picturing

Basis

Sample Questions

Politics

Barnett and Duvall (2005: 42) define power as the 'production, in and through social relations, of effects that shape the capacities of actors to determine their circumstances and fate'.

- How do resources and capacity set the stage and even predetermine the possibilities for actors?

Proximity to the Poor

Collaborative partnerships are to be 'based on a spirit of strengthened global solidarity, focused in particular on the needs of the poorest and most vulnerable and with the participation of all countries, all stakeholders and all people' (UN, 2015, 4).

- Where does the voice of poor get pictured, alluded to, accounted for? When is a proxy used? A substitute? What is lived experience?

Progress

'Like the earlier models of development, it runs the risk of using the wrong yardstick for measuring 'progress' ... a space of possibilities for broader individual and collective endeavours, culturally defined (Escobar, 2011: 87

- What gets reported as the 'conclusions'? How is it configured? What was measured? What was the yardstick used? Who is accountable?
